

## Transfer data between requests

```
pm.variables.set()
pm.variables.get()
```

```
× + •••
GET Get Status RSS feed
            https://status.getpostman.com/history.rss
GET
                                Pre-request Script
Params
                  Headers
       Authorization
                          Body
 53
     // save the current state of the saved posts
     pm.variables.set('posts', JSON.stringify(allPosts));
     // if there are any new posts to notify via Slack,
     // call the next request, otherwise terminate collection run
 59 if (!postsForSlack) {
          postman.setNextRequest(null);
          console.log("No new articles found.");
 62 - } else {
          postman.setNextRequest("RSS to Slack");
          pm.variables.set("postsForSlack", JSON.stringify(postsForSlack));
 64
 65
 66
```

## Stop next requests from executing

postman.setNextRequest(null)

```
